## FRONTLINE K-SERIES COOLANT PIPE DIAGRAM

SILICONE HOSE SET: 

METAL COOLANT / SENSOR PIPES: 

The above diagram shows the Frontline K engine coolant system and the relevant flow directions. Also shown is the cylinder head bypass pipe. We chose not to include this in our system and have not had adverse effects from this.

If you choose to use our coolant system you do so at your own risk and Frontline does not accept any liability.

This system has been developed to give the maximum efficiency with ease of installation. Tests have shown that a good condition, standard 1275cc radiator is adequate up to 1.6K. Above this we recommend that the alloy radiator is used.
